Review Workflows**

**Multi-language
Support**

**Publish Responsive
Content**

**Project Analysis
and Reporting**

Why Choose MadCap Flare?

Advanced Single-Sourcing

Single sourcing is the practice of reusing common content throughout your documentation and other content deliverables. From a single source, you can create multiple versions, publish multiple output formats and translate content into any number of languages.

MadCap Software continues to innovate with features that you simply cannot find on any other platform – such as micro content authoring – that give us the ability to provide amazing user experiences for our customers.

Paul Pehrson | Sr. Information Developer, Venafi

Powerful Multi-Channel Publishing

Multi-channel publishing allows you to publish your content to many different output formats, all from a single Flare project. Deliver multiple format types to your end users at very little incremental cost, while streamlining content delivery.

Import Legacy Content
