

Enterprise DITA CCMS for Technical Content Management

Streamline technical communication with our enterprise-class, DITA-based Component Content Management System. Create, manage, and publish personalized content with ease. Seamless collaboration and effortless scalability for enterprise content operations.

Large-Scale Documentation Projects

Efficiently manage technical content and streamline document processing for professional outcomes.

Enhanced Workflows, Processes, and Templates

Optimize and automate documentation processes with dynamic release management.

Full Traceability and Auditing Tracking

Ensure comprehensive tracking and version control. Maintain compliance and strengthen accountability across all content components.

Advanced AI-Powered Writing Assistance

Transform content creation with Oxygen AI Positron Assistant. Run multi-topic and map spell checks. Perform bulk checkout and more.

Futureproof Content

Scale with confidence and deliver adaptable content that evolves with your business and drives lasting impact.

Distributed Teams

Empower remote teams with global accessibility and streamlined collaboration for optimal productivity.

Start Small, Go Big

Discover a suite of products that caters to different needs, enabling you to start small and scale up with your business needs.

Streamline complex and parallel releases, expedite review & approval workflows, implement access controls in secure & certified repositories.

Enhance regulatory compliance with tools for analytics, traceability, auditability, reporting, access controls, and governance.

Migrate easily between MadCap products to a solution that matches your use case, and budget.

DITA is the widely adopted standard for structured documentation.
Adopted by Global 2000 and Fortune 500 companies.
